## CEES Technical Meeting

**October 8, 2010**

**Session Chairman: Markus B. Dumelin**

- 09.00 **Designing Sustainable Products - Using Environmental Engineering as a Tool**  
K.-F. Ziegahn, Karlsruhe Institute of Technology KIT, Eggenstein, Germany
  
- 09.30 **Specific Considerations for the Derivation of Test Severities for Tracked Vehicles**  
**Def Stan 00-35 Part 5 / Chapter 12-04**  
D. Richards, Lockheed Martin UK INSYS
  
- 10.00 **Measuring Shock**  
B. Bill, KISTLER Instrumente AG, Winterthur, Switzerland
  
- 10.30 B R E A K
  
- 11.00 **Stabilized Mast on Vehicles and Boats**  
E. A. Zurfluh, Thales Suisse SA, Zurich
  
- 11.30 **Product qualification using dust testing**  
U. Teipel / Georg-Simon-Ohm Hochschule, Nürnberg
  
- 12.00 L U N C H
  
- 13.00 **Dynamic stresses and humidity acting on corrugated boxes - A new experimental approach**  
T. Trost, innventia, Kista-Stockholm
  
- 13.30 **Influence in different Beginnings of Outdoor-Weathering on Weathering-Results**  
W. Rauth, Bayer MaterialScience AG, Leverkusen
  
- 14.00 **Time-compressed weathering tests - Simulation of the solar radiation is decisive**  
A. Schönlein, Atlas Material Testing Technology GmbH, Linsengericht-Altenhaslau
  
- 14.30 **"Virtual Product Qualification of Polymer Parts - ViPQuali" - Possibilities and Gaps**  
T. Reichert, Fraunhofer ICT, Pfanzelt
  
- 15.00 **Implementation of the new IEC 60068-2-1 and -2 and a conceivable approach**  
U. Grossen, RUAG Land Systems AG, Thun, Switzerland
  
- 15.30 **END**
